WITHROW & HILLOCK,

PATENTEES OF THE
NEW PRINCIPLE

On which we are Manufacturing the

ARCTIC REFRIGERATOR,

In a variety of styles, for the use of

Families, Grocers, Restaurants, Hotels, Milk
Dealers, etc., etc.

We have also Patented a system of Ventilation, as applied to
Refrigerators of all sizes, which we alone have the right
to use, and which has proved to be a great success.

——
We guarantee pure DRY AIR, with a very low degree
of temperature and moderate consumption of Ice.

——
If you want the best, get

TO THE Canadian Public.

FORMERLY, persons wanting a reliable Refrigerator, had to import one from the United States, but owing to the Tariff changes, the necessity exists of having some one make a specialty of the Manufacture of Refrigerators, with some regard to scientific principles.

We have pleasure in calling your attention to the fact, that we have succeeded in producing a Refrigerator, which we claim to be the best made in Canada and equal to any made in the United States.

We will be happy to show intending purchasers, or others calling upon us, the principle on which we build them and the variety of styles.

N.P.---GET THE "ARCTIC."

WITHROW & HILLOCK.

Factory cor. of

Office and Warerooms,

114-116 Queen-st. East.

TORONTO.

WITHROW & HILLOCK'S

IMPROVED PATENT

Arctic Refrigerator.

WE have p'easeure in calling the attention of those wishing to get a good Refrigerator, to the great improvements we have made in the manufacture of the **ARCTIC**.

To successfully manufacture Refrigerators, they being a bulky article, we have been forced to erect a commodious warehouse and additional work room, so that we are now enabled to have the entire of the manufacture done under our own supervision and at first cost.

This enables us to offer this Refrigerator to the public at such prices as will do away with the necessity of any one having to put up with the Lined Packing Cases, that are usually sold under the name of Refrigerators—good enough to look at—but worthless for the purpose for which a Refrigerator is intended.

For the principle on which we are building all our Refrigerators, we were awarded the Silver Medal and First Prize, at the Industrial Exhibition of 1880. We think we have the best Refrigerator made in Canada, or imported, and are willing to test it against all comers.

WITHROW & HILLOCK.

Factory cor. of

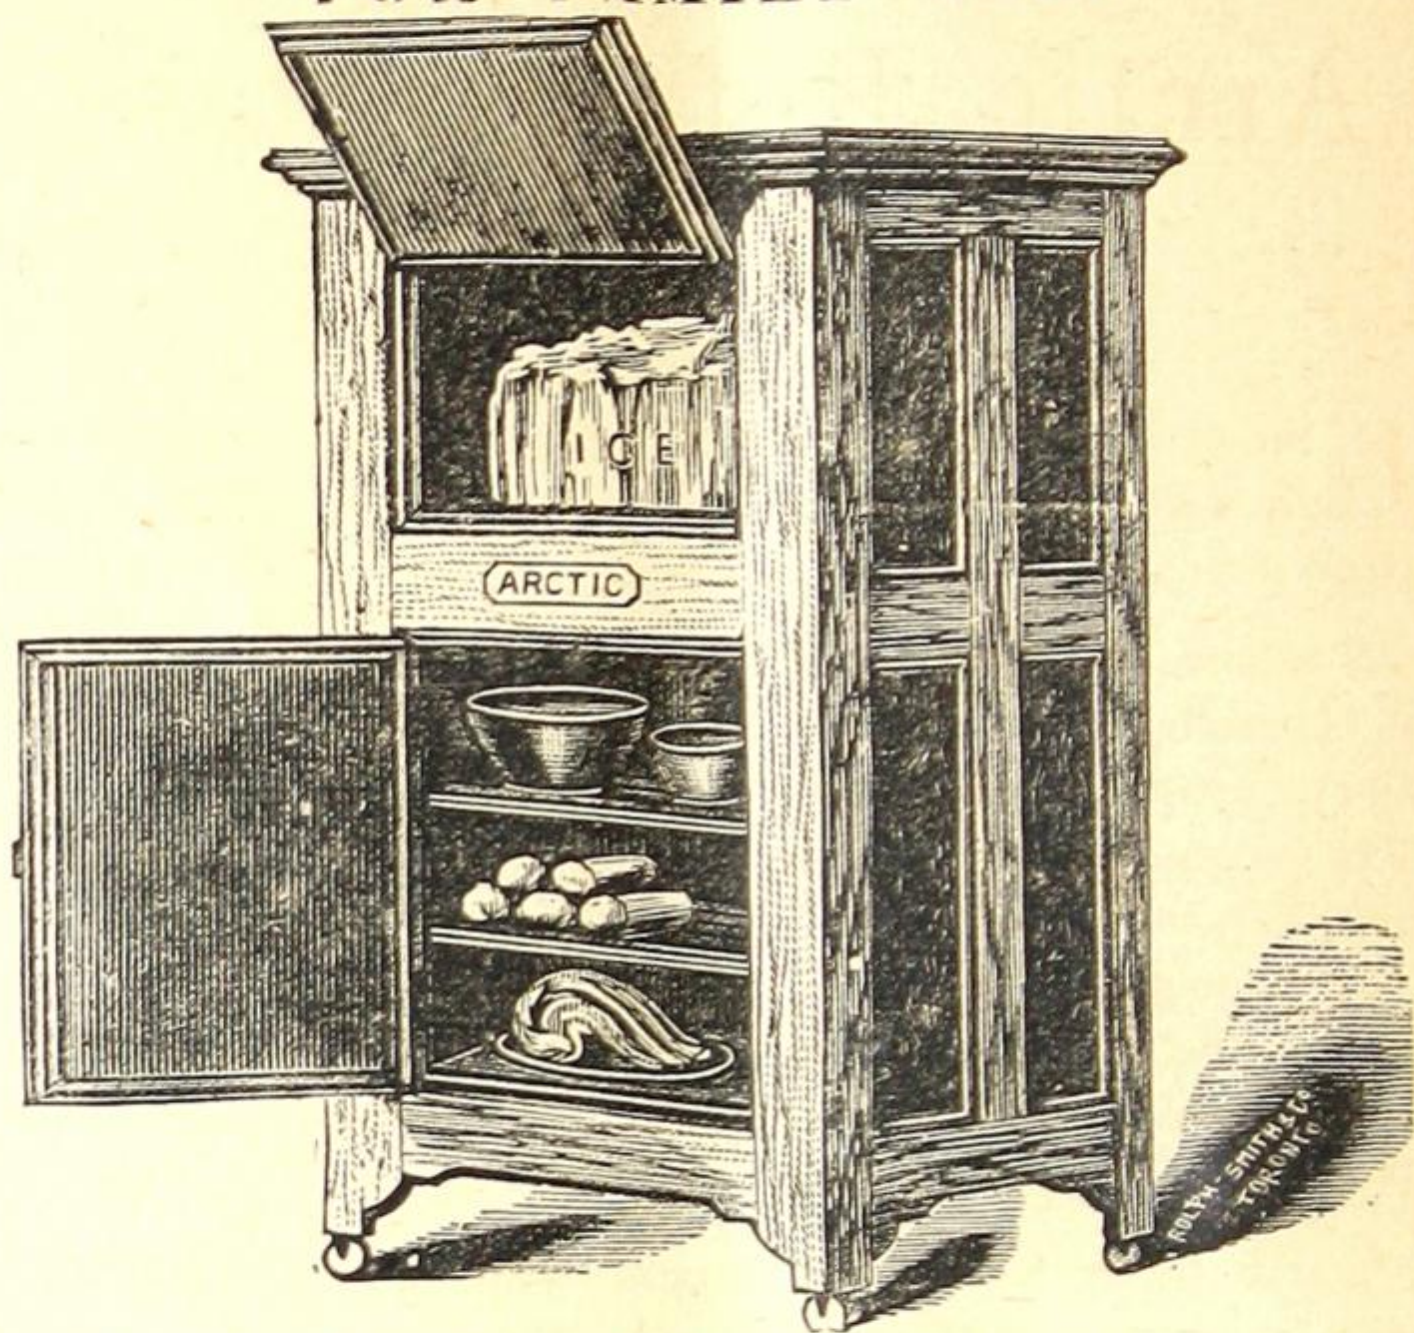

Queen and George-sts.

TORONTO.

Office and Warerooms,

114-116 Queen-st. East.

IMPROVED PATENT
Arctic Refrigerator,
 FOR FAMILY USE.

We are making Family Refrigerators in three sizes, all precisely of the same construction, except in size. The cut represents our No. 2, this being the medium size,—the No. 1 and No. 3 being proportionately smaller and larger.

WITHROW & HILLOCK,

Factory cor. of
 Queen and George-sts.

Office and Warerooms,
 114-116 Queen-st. East.

TORONTO.

WITHROW & HILLOCK'S

IMPROVED PATENT

Arctic Refrigerators.

IN the manufacture of these Refrigerators, we are careful to use only well-seasoned materials, carefully put together by experienced men.

The surrounding walls and top and bottom are all three inches thick, having in their spaces two layers of prepared felt paper and an artificial lining, which our experience has proven to be very successful in the retention of the cold air of the chamber, and, as a consequence, the less rapid consumption of the Ice. The drainage pipe from the Ice chamber is fitted with a syphon trap. The door openings are fitted with three rebates, for the more completely retaining the cold air. The shelving is adjustable, to suit the size of dishes.

Our ordinary Refrigerators are all finished in oak graining, with good lock, white knob, and castors.

WITHROW & HILLOCK.

TORONTO.

WITHROW & HILLOCK'S

IMPROVED PATENT ARCTIC REFRIGERATOR.

The above cut represents our No. 3 Family Refrigerator, most of which we make with the Ice door hinged on top and bottom doors in pairs, without the centre division. The cut shows box with centre division, so that one part of the Refrigerator can be left open for the use of the kitchen, and the other compartment in charge of the housekeeper if desired. All our boxes are made on the same principle and fully warranted.

Factory cor. of Queen and George-sts.

WITHROW & HILLOCK.

TORONTO.

Office and Warerooms, 114-116 Queen-st. East.

WITHROW & HILLOCK'S

IMPROVED PATENT

ARCTIC REFRIGERATORS,

FOR THE USE OF

GROCERS, PROVISION AND MILK DEALERS, BUTCHERS, &c.

FOR Grocers' use we make a variety of shapes, some of them tall—like the Lager Beer cut—with solid doors below, and glass doors to the upper portion for the display of butter, etc.

We also make a Counter Refrigerator for showing butter, not unlike the ordinary show case, the glass portion of which is made double, to prevent sweating. For special shapes and sizes to fit some certain spaces, we will be glad to give estimates.

We build also Large Cooling Rooms for Butchers or Milk Dealers, made portable, so that they can be unbolted and put away during winter time in cases where the shop or sales room is small.

In these large Boxes, as well as in our Family Refrigerators, we guarantee them perfectly dry and of lower temperature than any others made in Canada.

WITHROW & HILLOCK.

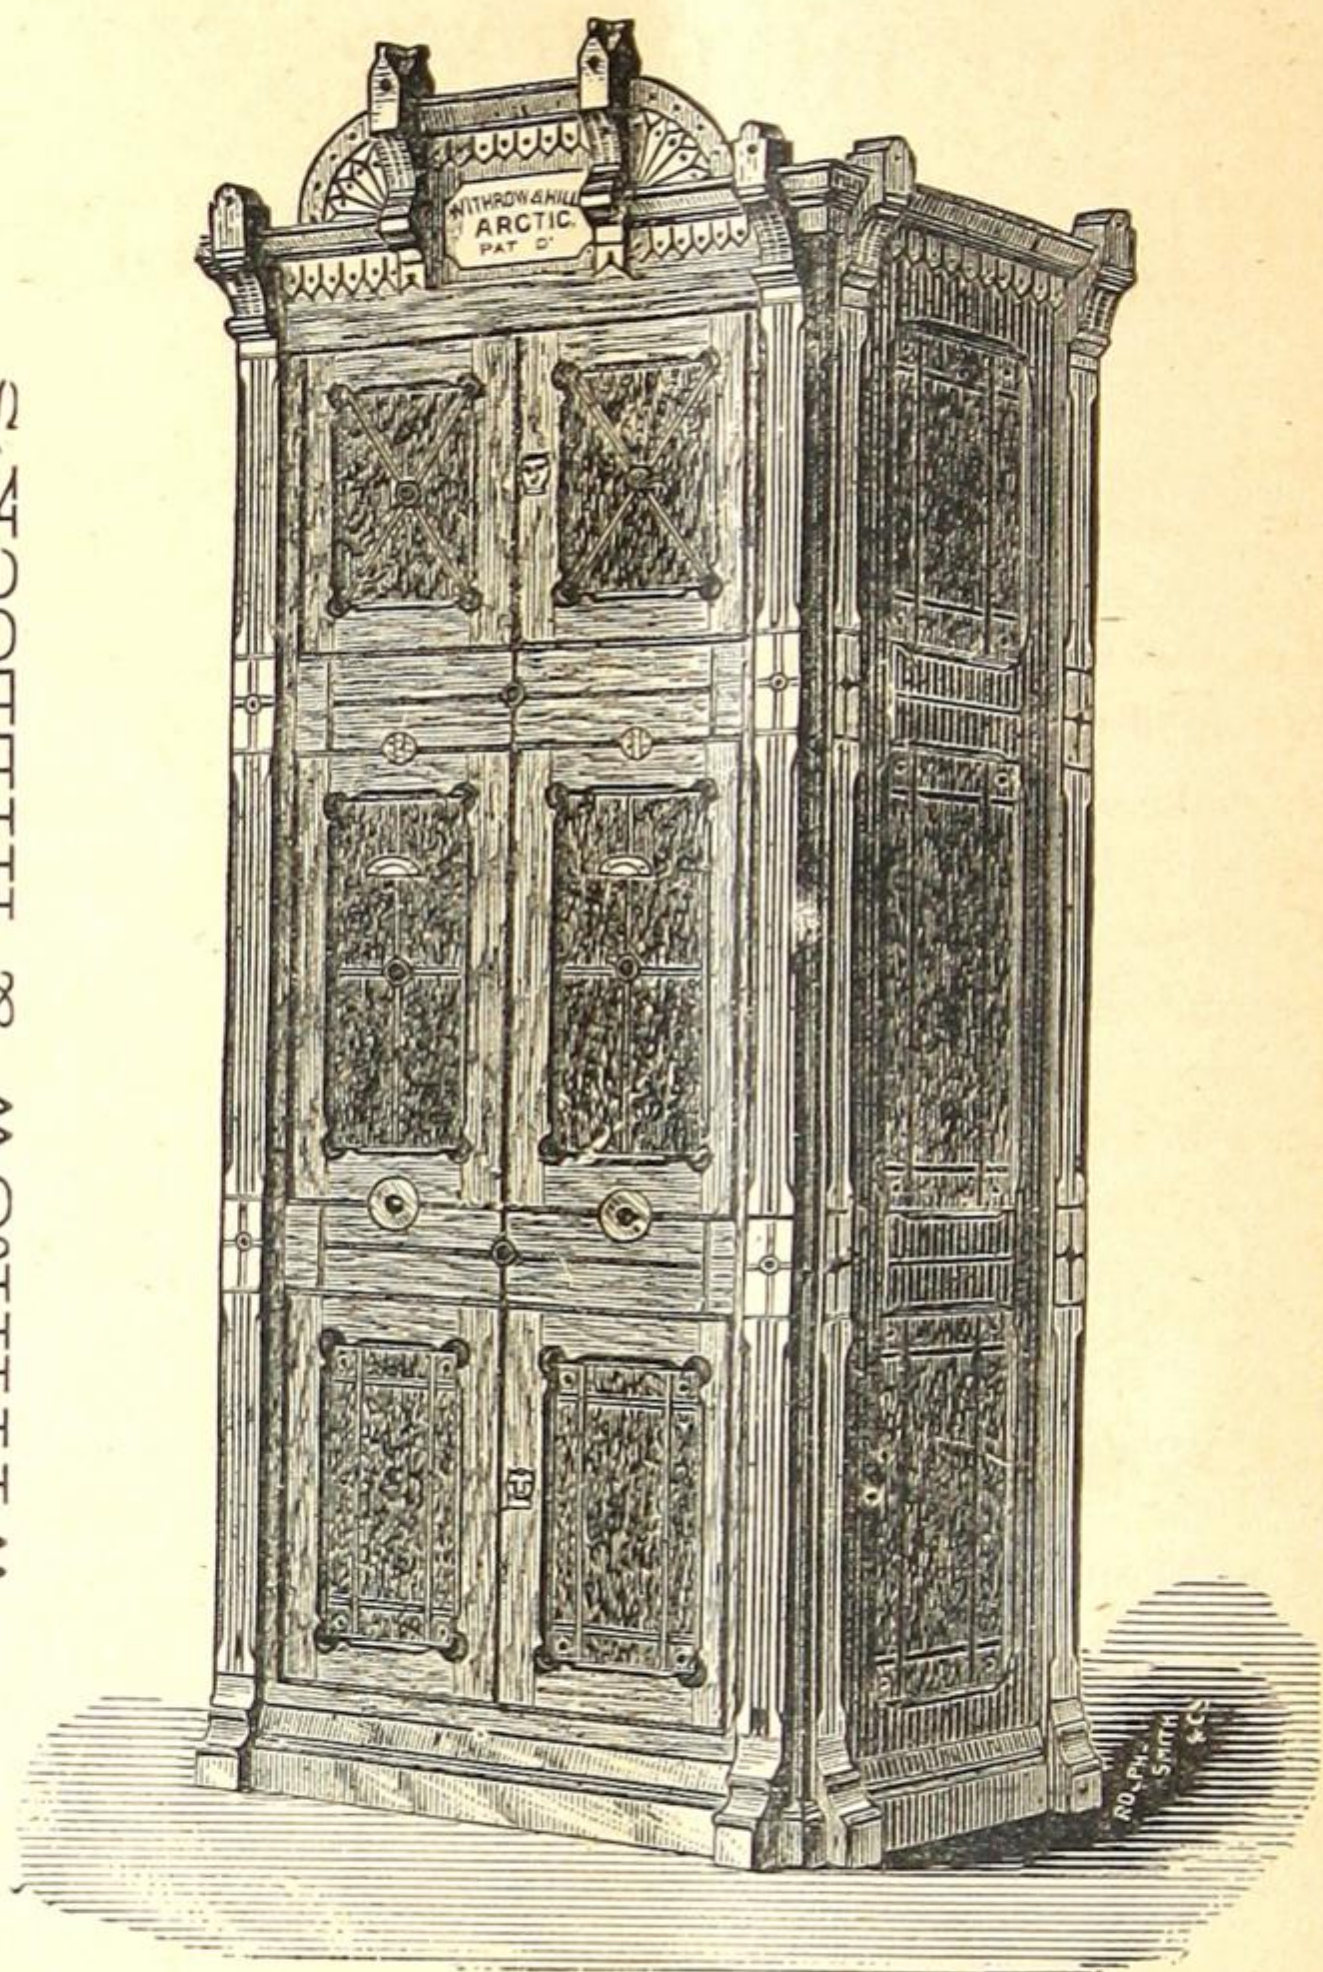

Factory cor. of

TORONTO.

LAGER BEER REFRIGERATOR.

WITHROW & HILLOCK'S

TO BREWERS, HOTEL AND SALOON KEEPERS.

ON the opposite page we give a cut of our Upright Lager Beer Refrigerator, 4 kegs, built in the same manner as the rest of our manufacture, with thick walls and Ventilator. They are all furnished with our patent Tap-hole Protector with rubber flanges, the whole of the trimmings being nickel plated.

We make a variety of sizes and shapes of these Beer Boxes, to suit special places and requirements. We guarantee them to be the dryest and coldest boxes made in Canada.

We can refer to a list of Testimonials on file at our Office, from parties using our Lager Beer Boxes, but have only room for the following from the well-known Brewers, Messrs. O'Keefe & Co., of this city, for whom we have made a large number.

TORONTO, March 11, 1881.

Messrs. WITHROW & HILLOCK.

Gentlemen,—In reply to your enquiry as to how we are satisfied with your Refrigerators (of which we are now using a great number), we would say that the recent improvements you have made on the **ARCTIC** makes it, in our opinion, the best box now manufactured. We have seen it register several degrees lower than any box of which we have any knowledge, we are thoroughly satisfied with those you have made for us.

O'KEEFE & CO.

Brewers and Maltsters, Toronto.

INSTRUCTIONS TO THOSE USING THE *ARCTIC REFRIGERATORS.*

OUR Family Refrigerators being lined with bass wood, will do away with the frequent scaldings which it has been necessary to give to the zinc-lined boxes heretofore sold in this market, and which then failed to make them fit to put any kind of food into them. The same attention to cleanliness that a good housekeeper gives to an ordinary cupboard or sideboard, where the same kind of food is usually kept, is all that is necessary for the **ARCTIC**.

Fill the Ice chamber when starting to use, and then regulate your supply according to size of box, so that a good supply of Ice is always in the box. This is the true economy, as you both save Ice and get the fullest satisfaction from the Refrigerator. Many persons wrap the Ice in a woollen cloth to preserve it. This is mistaken economy, as the Ice should be exposed to the Air in circulation in the box, in this way securing the lowest temperature.

WITHROW & HILLOCK,

Office and Warerooms,

Manufacturers.

TESTIMONIALS.

We have pleasure in publishing a few of the many testimonials we have received, speaking as to the merits of the *Arctic*.

SHERIFF'S OFFICE, TORONTO,
March 11, 1881.

Messrs. WITHROW & HILLOCK.

Gentlemen,—The Refrigerator you furnished me with last summer has given entire satisfaction. It is the best I have ever used.

Yours, etc.,

FRED. W. JARVIS.

ROSSIN HOUSE, TORONTO, ONT.,
March 11, 1881.

Messrs. WITHROW & HILLOCK.

Gents,—I am most happy to give the testimonial. Without exception, it is the best cooler I know of. I have already sent you a number of customers and shall continue to do so, and you may refer people to me.

Faithfully,

MARK H. IRISH.

QUEEN'S HOTEL, TORONTO,
March 11, 1880.

Messrs. WITHROW & HILLOCK.

Gentlemen,—In reply to your enquiry as to the comparative merits of Refrigerators.—We have had in our time considerable experience in large Refrigerators and Cooling Rooms. We could not get along without them. The Murphy Box you formerly made was the best we ever had put up for us. The Improved Cooling Room you exhibited at the Industrial Exhibition, and for which you received the Silver Medal, was decidedly the best Box we ever saw, being a vast improvement on ours—as it was several degrees lower in temperature and perfectly dry.

Yours sincerely,

MCGAW & WINNETT.

From the President of the Stratford and Huron Railway Co.

STRATFORD, June 24, 1880.

Messrs. WITHROW & HILLOCK.

Gents,—In reply to your favor of the 23rd instant, I take pleasure in stating that the Arctic Refrigerator bought of you last month is all that you represented it to be, and particularly regarding its keeping dry inside. Though about double the size of the one I had before, I do not think it requires any more Ice. Wishing you success in this Canadian enterprise.

Yours truly,

S. S. FULLER.

—
EGLINGTON, June 23, 1880.

Messrs. WITHROW & HILLOCK.

Gentlemen,—In reply to your note relative to the Refrigerator you altered for me according to your patent.—It fully answers the purpose, giving a cold, dry atmosphere where the food is kept, when before it was always moist and often offensive.

I am, truly yours,

JAMES LESSLIE.

—
From J. A. Chase, Chemist and Pharmaceutist, Paris, Ont.

PARIS, May 27, 1880.

Messrs. WITHROW & HILLOCK.

Gentlemen,—Enclosed please find P.O. order for the amount of invoice received. Your Arctic Refrigerator is all that you claim for it,—perfectly dry chamber for provisions, temperature low, and the consumption of Ice moderate.

Yours truly,

J. A. CHASE.

—
TORONTO, June 15, 1880.

Messrs. WITHROW & HILLOCK.

Your Refrigerator is all that is claimed for it. I use the Grocer's Refrigerator.

ANDREW MCFARREN,
Grocer, cor. Queen and Sherbourne-sts.

From Mr. James Britton, well-known Butcher of St. Lawrence Market.

TORONTO, March 11, 1880.

Messrs. WITHROW & HILLOCK.

I have had the Murphy box (which you formerly made) in constant use for the last two years and am perfectly satisfied with it. I do not see how any dealer in meats or provisions can do without it. I certainly would not do without mine for a good deal, as I know that it effects a large saving, besides much improving the quality of the meat.

Truly yours,

JAMES BRITTON.

—————
TORONTO, March 12, 1881.

Messrs. WITHROW & HILLOCK.

Gentlemen,—I am using a Cooling Room that you put in my store in 1879, and it has given me entire satisfaction. It has been used constantly since then. It has never shown the least sign of dampness and is very economical of Ice. You can refer persons, wishing to see a first-class box, to me.

Yours, etc.,

JOHN SMALL,

Chicago Market, 268 and 270 Queen-st. East.

—————
From E. Lawson, Wholesale and Retail Grocer and Confectioner, Sign of the Queen.

TORONTO, March 11, 1881.

Messrs. WITHROW & HILLOCK.

I have been using one of your large sized Refrigerators in connection with my business as confectioner and find it indispensable. It gives me every satisfaction and effects a large saving, as I now have nothing wasted on account of hot weather. Eggs, butter, and everything else placed in the cooling room are kept in proper preservation.

E. LAWSON.

From W. Christie, of Christie, Brown & Co., Biscuit Manufacturers.
TORONTO, March 14, 1881.

Messrs. WITHROW & HILLOCK, Queen-st. East, City.

Dear Sirs,—In answer to your enquiry, "How do you like our Refrigerator?" I need only say that my experience with it has been most satisfactory. We have not used any Ice in it this winter, your patent Cold Air Flue chilling the box sufficiently.

Truly yours,

W. CHRISTIE.

From W. H. Hall, proprietor of Franklin House.
MARKHAM, June 23, 1880.

Messrs. WITHROW & HILLOCK, Toronto.

The Arctic Refrigerator I purchased from you some time ago gives perfect satisfaction. It is perfectly dry. I have kept matches in it for two weeks and they light as readily as when I put them in.

Yours, etc.,

W. H. HALL.

From J. R. Neff, General Merchant.
ST. GEORGE, June 26, 1880.

Messrs. WITHROW & HILLOCK.

Gents,—Yours received. Beg to state in reply, that I must say that your Refrigerators are fully what you claim for them, and that I am well pleased with mine. Truly yours,

J. R. NEFF.

ORILLIA, June 24, 1880.

Messrs. WITHROW & HILLOCK.

Gentlemen,—I have much pleasure in testifying to the thorough efficiency of your Arctic Refrigerator. It answers every purpose for which it is intended, keeping the contents in nearly a frozen state and economising the Ice to a marvellous extent. I shall recommend its use to any of my friends requiring a really serviceable and economical Refrigerator. Yours truly,

E. J. KIDD.

TORONTO, March 11, 1881.

Messrs. WITHROW & HILLOCK, Manufacturers of Refrigerators.

We, the undersigned, thoroughly inspected the Butchers' Refrigerator or Cooling Room you had in operation in the Carriage Buildings at the last Industrial Exhibition, and have no hesitation in pronouncing it to be the best box we have ever seen. The box was in operation for the full time (two weeks), having large quantities of meat in it most of the time, and no sign of condensation. The provision chamber was perfectly dry and of extremely low temperature, and more surprising still, above the Ice or upper ceiling it was as dry as below.

JAMES BRITTON, Butcher, etc.,
13 and 15 St. Lawrence Market.
H. R. FRANKLAND, Butcher and Contractor,
22 and 24 St. Lawrence Market.
G. H. ROBINSON, Butcher, 237 Yonge-st.
ARTHUR GRIFFITHS, Butcher, 471 Yonge st.
JOHN SYMONS, Butcher, 231 Yonge-st.

I have not only examined the Box referred to as on exhibition, but used it during the whole of the time for holding butter, pastry, etc., and found it very satisfactory. It was the driest and best box I ever used.

EDWARD LAWSON,
Manufacturer of Pure Candies on Exhibition Grounds.

TORONTO, March 11, 1881.

To Messrs. WITHROW & HILLOCK.

From the examination of the Murphy Box you formerly made and from the improvements you have made and exhibited last year at the Industrial Exhibition, I have ordered from you a large Cooling Room, as I am satisfied that your box is the best one made in Canada.

H. R. FRANKLAND,
22 and 24 St. Lawrence Market.
